

Free PAP/HPV screening - Forsyth

Start date: 4/20/2023 5:30 PM

End date: 4/20/2023 7:30 PM

The event is for uninsured women between the age of 30 & 65. Their last PAP screening must be greater than 3 years. Participants must pre-register - space is limited. *A PAP test is used to detect potentially pre-cancerous and cancerous processes in the cervix. The test can find cell changes to the cervix caused by the Human Papilloma Virus, or HPV. This test can help healthcare providers determine which women are at a higher risk for cervical cancer.

Registration: Registration is required. To register, please call 336-718-7000 Option 5.

Cost: This event is free to all uninsured women.

Location: 1010 Bethesda Court Winston-Salem, NC 27103.

Questions? Please call 336-718-7000 Option 5 for more information.

En Español: Prueba de Papanicolaou y Virus de Papiloma Humano La prueba de Pap examina su cérvix para detectar células anormales causadas por el virus del papiloma humano (VPH). La prueba del VPH busca el virus en las células cervicales. Ambas pruebas son muy importantes para las mujeres de 30 años o mayores. ¡Reserve su cita GRATIS hoy mismo!
