Novant Health is committed to giving back to the communities we serve, supporting our patients, their families and our team members. Investments in strategic partnerships with nonprofit organizations that address identified health needs help to expand our mission outside clinic and hospital walls.

At Novant Health, we know that health starts in our families, our schools and workplaces, in our playgrounds, in the air we breathe and the water we drink. We know that environments have an enormous impact on our health long before we see a doctor. We recognize that we cannot begin to move the needle on health outcomes without addressing root causes that influence health.

The goal of the environment investment priority is to support safe and clean communities by focusing on housing, neighborhoods, food and active living. An individual’s health is determined, in part, by access to resources to meet daily needs and the resources available in our homes, neighborhoods and communities.

Novant Health is interested in supporting programs that:

» Increase food access
» Increase food security and nutrition education
» Improve housing quality
» Support sustainable, positive neighborhood change and revitalization.

Additionally, Novant Health is focused on promoting active lifestyles and healthy behaviors, but also ensuring access to community-based resources that provide opportunities for recreational activities and community living.
