Personalized cancer care

At Novant Health, we take cancer care personally. Understanding that no two cancers and no two people are exactly alike, our expert team of more than 100 specialists works with you to develop multidisciplinary treatment plans unique to each patient's needs. We combine the latest clinical advancements — like targeted therapy and immunotherapy — with comprehensive support programs to provide the care your patients need.

A multidisciplinary team approach

At Novant Health, your patients can consult with a comprehensive team of cancer specialists. This consultation puts your patient at the center of his or her care and includes input at every step of treatment from a wide range of specialists, including medical oncologists, radiation oncologists, surgeons, pathologists, radiologists, research coordinators, nurse navigators, oncology nutritionists, genetic counselors and oncology social workers.

Expertise to meet every need

The Novant Health cancer care team includes board-certified specialists with advanced training and expertise in specific cancers — from breast, lung, prostate, gynecologic and colorectal cancers to melanoma and lymphoma — as well as various treatment options available to fight them.

Please see reverse for a detailed listing of our extensive services.

Quality assurance

- Our multidisciplinary approach has garnered national recognition, including program accreditation by the American College of Surgeons Commission on Cancer and the National Accreditation Program for Breast Centers.
- We diagnose and treat nearly 8,000 cancer cases each year.
- A better treatment journey for your patients begins at the first referral. We strive to see all referrals within 48 hours.
- We consistently demonstrate our commitment to improving cancer care through program expansions, including malignant and benign hematology, stem cell transplant and cellular therapy, integrative medicine for patient-centered care and the addition of a new state-of-the-art facility in our region.
- Novant Health Huntersville Medical Center was awarded colorectal disease-specific certification from The Joint Commission.
