Specialized women's care your patients can trust for a lifetime

At Novant Health, we appreciate women's unique healthcare needs and the necessity of a team approach to providing remarkable care. That's why our team of dedicated women's specialists commit to creating lifelong, meaningful relationships with both the women we care for and their primary care providers. Together, we can ensure your female patients have access to experienced specialists, the latest technology and compassionate care at every step of their health journeys.

Specialists for every need and life stage

Women's healthcare is no place for one-size-fits-all care. That's why we've built a comprehensive team of specialists prepared to address the unique needs that each new life stage brings. From gynecologists and obstetricians to urologists, specialized surgeons, neonatal intensive care providers and beyond, you can count on Novant Health for the expertise and talent to care for your patients now and into the future.

Comprehensive care for the whole woman

Our women's health team represents a broad range of specialties: routine gynecologic care, high-risk and general obstetrics, menopause care, pelvic pain management, incontinence treatment, fertility care, minimally invasive gynecologic surgery and more.

Quality assurance

- Novant Health maternity centers deliver more than 19,000 babies each year.
- All eligible Novant Health facilities are Baby-Friendly accredited for optimal infant feeding care.
- Available level III neonatal intensive care unit (NICU) provides infants with family-centered, high quality care with an on-site Ronald McDonald Family Room.

Please see reverse for a detailed listing of our extensive services.
