

How You Can View and Download Images Using MyChart.

Novant Health patients should follow these steps to view and download images from MyChart. Only cardiology, radiology and surgery scans performed since January 2021 will have images available.

MyChart Username Password Sign in	1. Enter the URL NovantMyChart.org and log into MyChart.
New User? Sign up now	2. If you don't already have a MyChart account, you'll need to create one.
	3. Click the Test Results icon.
Images Click here to view full-resolution images	4. Find your test containing the desired images and click the Images link.
First Prev. Next Last	5. This opens a new window displaying your images. Navigate through the images using the toolbar buttons at the top.
Download	6. To download the images, click the Download button.
Download Study Image: Constraint Download Study ID Patient Name NA Patient Download Study ID NA Files Count NA Data Size NA Download format NA Download As DICOM CD Image: Create Dicombir file Deidentify Default Please import the downloaded study in the target system and ensure that the entire study content is available. Download Cancel	 7. This opens a window allowing you to select download options from the checkboxes: No boxes checked – Individual image will be downloaded. Create DICOMDir file – Creates a file and downloads multiple images so they can be seen together. Download as DICOM CD – Downloads the images as a file ready to burn to a CD or DVD. (Some scans may be too large to burn.)
	8. You will need a DICOM viewer to see the images on your personal
