Pediatric unit

Giving children a better healthcare experience

Hemby Children's Hospital

NH NOVANT[®]
HEALTH

Hemby Children's Hospital

The pediatric unit is located on the second floor of the main hospital.
This unit is for patients ages 0-17.

Please ring the doorbell
for entrance to the unit.

Patient rooms

All patient rooms are private and have a place in the room for family to sleep.

Visitors are welcome anytime during your admission.

Most rooms have a small refrigerator, microwave and Xbox for movies.

Nurses station

This is the main nurses station; a work area for the doctors and nurses.

Playroom

This is the Hemby playroom. It is open during the day to all patients who are able to leave their room.

Check out the Hemby Happenings calendar located outside the playroom to learn more about the activities taking place on the unit.

Teen room

The teen room is available for patients and siblings who are 13 and older. This is a great space to play games, listen to music, or work on a craft project.

Child Life

Child Life Specialists help children cope with the stress of hospitalization, injury, uncertainty of illness and disability. They promote effective coping through age appropriate medical preparation and education, play and self-expression.

If the doctor decides you need a test or procedure, a child life specialist will be there to tell you everything you need to know about that test and help answer any questions you may have about the hospital.

Ask your nurse if a child life specialist is available
